**the smallest footprint
leaves the biggest impression™**

The smallest footprint leaves the biggest impression, a phrase we believe so strongly, we have coined it as our environmental motto. Stemming from our belief that less is more when it comes to ecological impact, we are devoted to decreasing our environmental footprint where and when we can.

From sustainable design — including environmentally responsible product materials, manufacturing, packaging and fulfillment — to supplier selection, third party certifications, use of alternative energies and the support of environmental conservation, we are committed to integrating the most environmentally responsible initiatives within our company and product design.

SUSTAINABLE DESIGN

Sustainable design crosses numerous industries and is often practiced within varying ranges of its full spectrum. In its entirety, we feel sustainable design combines ecological, social and economic principals in the creation of products and services that minimize environmental impact.

Through creativity and innovation, our sustainable design practices unite efficiency, use of sustainable resources, extended product life cycles and the reduction of materials, waste and energy consumption. We support responsible forestry, improvement of air quality, use of 100% green electricity and carbon offsetting for all paper usage, manufacturing and shipping. We select product and packaging materials that are environmentally responsible and can be reintegrated into the post consumer supply chain through reuse or recycling programs. We aim to bring increased products and packaging solutions into the marketplace that are biodegradable and/or compostable.

PRODUCT ECO-VALUE: SNAPSHOT

We strive to offer the most comprehensive environmentally responsible paper products in the industry. All Sallart Studios' products display the appropriate environmental certifications and eco-value, supporting our clients' green purchasing choices. For detailed information about our products and product eco-value, please refer to the Product Eco-Value section of this report. [p.11]

MANUFACTURING AND FULFILLMENT

Typical manufacturing and fulfillment processes can have a heavy burden on our ecological footprint. In recognition of this from the onset of Sallart Studios Inc., we integrated a selection of alternative technologies, energy sources and procedures to lessen our environmental impact.

Our primary mandate is the reduction of energy consumption and waste output. Secondarily, we offset carbon-producing energy usage and facilitate the diversion of waste through programs used to reuse and recycle.

- ▶ Our print manufacturing uses 100% green electricity.
- ▶ All additional carbon producing energy incurred through manufacturing and fulfillment is certified 100% Carbon Neutral, offset through the purchase of Gold Standard carbon credits.

- ▶ Our products are printed and manufactured in an ISO 14001 certified facility, ensuring environmental management systems and standards are monitored.
- ▶ We print on-demand in order to eliminate excess product, waste and energy consumption.
- ▶ All inbound and outbound shipments — from the receipt of raw materials until the final products are received by our clients — are certified 100% Carbon Neutral.
- ▶ In the combined interests of our clients, our company and the environmental benefit, we work with our customers to reduce the shipping footprint and costs. Integrating into our clients' shipping infrastructures and logistics, using the most direct shipping routes, and selecting shipping services supporting a reduced ecological footprint are elements we take into consideration.
- ▶ We use recycled boxboard and cardboard with post consumer waste content for packaging and shipping.
- ▶ Where possible, we reuse shipping materials from inbound shipments or donate used packaging and containers to other organizations.

ALTERNATIVE ENERGY & OUR CARBON FOOTPRINT

Alternative Energy

We support clean, renewable electricity producers who are displacing polluting and carbon-intensive electricity production on the grid. All Sallart Studios' operations, design and printing are powered with 100% green, carbon-free electricity. This power is sourced exclusively from generators who meet or exceed the federal government's Environmental Choice Program EcoLogo[™] standard for renewable electricity. The power comes from clean, emission-free sources such as wind power and low-impact water power instead of carbon-intensive sources such as coal.

Carbon Footprint

Sallart Studios Inc. is certified as a 100% Carbon Neutral Company, through the purchase of Gold Standard carbon credits.

Gold Standard carbon credits are the highest quality carbon credits currently available for voluntary offsets, funding premium projects on the market. Gold Standard requires that the renewable energy and energy efficiency technologies lead to sustainable development for local communities, such as increased standards of living, knowledge transfer, job creation or pollution reduction. All Gold Standard projects are rigorously tested for environment quality by registered third parties.

Sallart Studios Inc. offsets all of our operations, manufacturing, inbound and outbound shipping, business travel, employee commuting, and paper usage — including all paper used for our products as well as office and promotional use.

OUR STUDIO'S ECO-PROGRAMS AND MANDATES

Reduce and Reuse

With respect to the 3R's of Reduce, Reuse and Recycle, our primary goal is to *reduce* our waste output, energy and water consumption. Through renewable energy usage, water reduction measures in both the print process and our studio, and offsetting our carbon footprint, we establish a base-point from which we continue to build upon.

The Sallart Studios' Extended Life Program (ELP) contributes to the reuse of our packaging, display stands, and products that have been removed from the distribution chain.

Recycling Centre

In our effort to divert as much waste as possible from landfill sites, all of our paper, plastics, metals and glass items are sorted in our Studio Recycling Centre in accordance with the regional guidelines for our area. We collect our printer and toner cartridges for inclusion in remanufacturing, material recovery or recycling programs.

In-Studio Paper and Print Guidelines

Our studio paper and print guidelines promote double-sided printing and the reuse of scrap paper prior to being recycled; 100% of waste paper in our studio is reused or recycled. Our office papers and shipping labels are all Forest Stewardship Council certified.

Composting Program

Our on-site Studio Composting Program is designed to reduce landfill waste while contributing to organic grounds maintenance. Through the collection of food scraps, compostable paper products and grounds maintenance trimmings, we create our own organic soil amendment for use on our studio's premises.

Grounds Maintenance

Pesticide-free grounds maintenance and the integration of our own compost for use as soil amendment in our studio's gardens contribute toward developing a completely organic grounds maintenance program on our studio premises. Over the winter months we reduce the amount of de-icing salt through use of a more environmentally friendly de-icing product, using only enough to ensure the safety of our premises.

Earth Day Program

Each Earth Day, our studio dedicates a half day to cleaning up the surrounding curbs and roadsides, collecting garbage and items for recycling.

Cleaning Products

Our studio is cleaned and maintained with all natural and/or biodegradable cleaning products.

Co-Founder, Sally Reijerse
Roadside clean-up, Earth Day 2008

ECO-CERTIFICATIONS

Forest Stewardship Council Chain-of-Custody Certified

The Forest Stewardship Council (FSC) is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. FSC standards are globally recognized as having the highest social and environmental standards in forestry, with the most rigorous and credible certification system.

Sallart Studios Inc. is a FSC Chain-of-Custody (CoC) certified printer, certified by the Rainforest Alliance Smartwood program. CoC certification verifies the flow of FSC-certified forest products through the supply chain and ensures the credibility of FSC claims.

All Sallart Studios' products designated as FSC-certified are guaranteed to originate from well managed forests, where FSC standards ensure that environmental, community, worker and industry needs are balanced, and that long-term forest management plans are implemented.

SW-COC-003229
Responsible
Forest Management
©1996.FSC

Rainforest Alliance Certified

The Rainforest Alliance works to conserve biodiversity and ensure sustainable livelihoods by transforming land-use practices, business practices and consumer behaviour.

Sallart Studios is certified by the Rainforest Alliance Smartwood program as a Forest Stewardship Council Chain-of-Custody (FSC CoC) certified printer, in the support of responsible forestry through our products.

The Rainforest Alliance's forestry program protects soils, waterways and wildlife, while ensuring that workers and neighbouring communities are treated fairly. With an on-going demand for lumber, paper and other forest-related products, responsible forestry offers a solution to meet consumer demand, while protecting forest ecosystems.

Rainforest Alliance
Certified

100% Carbon Neutral Company and Products

Sallart Studios Inc. is certified 100% Carbon Neutral by Planetair, a not-for-profit service offered by the Unisféra International Centre. 100% of the carbon credits purchased by Sallart Studios are Gold Standard.

Gold Standard carbon credits are the highest quality carbon credits currently available for voluntary offsets, funding premium projects on the market. Gold Standard requires that the renewable energy and energy efficiency technologies lead to sustainable development for local communities, such as increased standards of living, knowledge transfer, job creation or pollution reduction. All Gold Standard projects are rigorously tested for environment quality by registered third parties.

Sallart Studios Inc. offsets all of our operations, manufacturing, paper usage — including all paper used for our products as well as paper for administrative & promotional use — inbound and outbound shipping, business travel and employee commuting.

Planetair-Certified
Carbon Neutral Company

100% Green Electricity

Sallart Studios Inc. is bullfrogpowered™ with 100% green electricity. All operations, design and printing are powered with green, carbon-free electricity.

By using Bullfrog Power we are supporting clean, renewable electricity producers who are displacing polluting and carbon-intensive electricity production on the grid. Bullfrog sources power exclusively from generators who meet or exceed the federal government's Environmental Choice Program EcoLogo[®] standard for renewable electricity. The power comes from clean, emission-free sources like wind power and low-impact water power instead of carbon-intensive sources like coal.

Sallart Studios Inc.

**the smallest footprint
leaves the biggest impression™**

SUPPLIERS AND PARTNERS

In our effort to fortify our values and provide added worth to our products, brand and stakeholders, our suppliers are selected with respect to high quality, environmentally sustainable and socially responsible products, services and business practices. We build relationships with our suppliers based on integrity, honesty, respect and open communication. Beyond the value created for our company and our supplier partners, we aim to create win-win-win scenarios, integrating the greater global community into the equation. By working together with our supplier partners, we aim to bring value and increase through efficiency, reduction measures and education.

GIVING BACK TO OUR PLANET

Environmental Outreach Program

In order to give back to the planet we take from, a percentage of Sallart Studios' profits is donated to environmental conservation, through our Environmental Outreach Program. Our donations contribute to funding projects engaged in the preservation and management of water, forestry, fishery and ecosystems.

Extended Life Program

Our sustainability mandates involve integrating the most environmentally responsible initiatives at all stages of our company practices, product design and manufacturing. We are continually looking for methods to extend our product life cycles.

The Sallart Studios' Extended Life Program (ELP) is designed to find additional uses for our packaging, display stands, excess product, and print runs that are below our quality standards and cannot be used for distribution, resale or client fulfillment. Through the development of Extended Life Program Partners (ELPP) — organizations that can use or reuse our products, and our Extended Life Program Members (ELPM) — clients participating in the donation of excess products, we are able to extend the consumer life of our products prior to being integrated into recycling or composting programs.

Additionally, the ELP facilitates awareness and education of ecologically responsible practices such as reduction, reuse, recycling and the integration of the Cradle to Cradle mentality of consumer products.

"we donate a percentage of our profits to environmental conservation in order to give back to the planet we take from. through the purchase of sallart studios' products, our clients' organizations are active participants in supporting the preservation and management of water, forestry, fishery and ecosystems."

OUR PRODUCTS

Sallart Studios creates and manufactures premium, innovative and ecologically responsible paper products for corporations, organizations, government and wholesale retail markets. Our products and sustainable design services include custom design packages, custom branding and messaging, and environmentally responsible print and manufacturing processes.

Beyond the primary use associated with each Sallart product, our products offer high environmental marketability value and on-product marketing for our clients to leverage through corporate communications and retail sales.

Our products are certified 100% carbon neutral, designed and manufactured with 100% green electricity, Forest Stewardship Council Chain-of-Custody certified and Rainforest Alliance certified. Please refer to the detailed eco-value of our products on page 14 of this report for more information.

ecOGREETINGS™ — corporate and retail greeting cards

Sallart's ecoGREETINGS™ cards — from custom corporate communication greeting cards, to custom and existing lines of greeting cards for retailers — are designed and manufactured with premium, environmentally responsible papers, displaying the complete eco-value and environmental certifications on the back cover.

Through visually appealing imagery and premium papers of varying textures, ecoGREETINGS™ are designed to create a sensory experience for the card recipients, stimulating a positive viewer response.

Sallart ecoGREETINGS™ double as a subtle and innovative communication platform for our clients — focused on both corporate and retail marketing profitability — providing tangible and intangible returns on investment. A positive viewer experience is particularly beneficial in warming recipients to receive our clients' targeted messaging, enhancing brand retention and brand value, while supporting and promoting social and environmental programs, foundations or other corporate stewardship initiatives.

miniCARD™ — miniature gifting cards

The Sallart Studios' miniCARD™ is a premium eco-gifting product for retail sales and corporate gifting. A mini greeting card and gourmet gift accent, the miniCARD™ doubles as a custom communication medium to promote our clients' brands, messaging and green business choices.

A true steward of environmental gifting, the miniCARD™ can further reduce the typical gifting footprint, eliminating the need for a larger card, envelopes, gift wrap and gift bags.

our products
ecologically responsible.
carbon neutral.

All miniCARDS™ are designed and manufactured with environmentally responsible materials and production processes, carrying the applicable environmental accreditations and eco-value on the back of each card.

Sallart's miniCARDS™ are custom designed and branded for our corporate and retail clients — from individual designs to complete lines of miniCARDS™ — or available as existing lines of cards, with the option of custom branding.

ecoPOSTCARD™ — corporate communication and retail postcards

Sallart's ecoPOSTCARDS™ are designed and manufactured with premium, environmentally responsible papers, displaying the eco-value and environmental certifications on the back.

Custom designed for corporate communications, promotional pieces, or as complete lines of postcards for retailers, the ecoPOSTCARD™ doubles as an eco-medium for our clients to leverage as a branding and communication platform. Complete customization of imagery, branding and messaging provides an opportunity to promote and support specific corporate, social and environmental programs, foundations and initiatives — whether used as a corporate communications piece, a retail item, or a combination of both.

Due to the nature of postcard mailings — both corporate mailers and retail consumer greetings — the ecoPOSTCARD™ offers our clients substantial marketing value and return on investment through on-product brand exposure and targeted messaging campaigns.

ecoTAG™ — retail point of sale product tags

On-product tags for point of sale display and promotion — including garment tags, hang tags and necks tags — ecoTAGS™ are custom designed communication eco-mediums, promoting and complementing our clients' products, brands and targeted messaging.

Designed and manufactured with ecologically responsible materials and processes, ecoTAGS™ display the full eco-value and environmental accreditations on-product, supporting our clients' environmental stewardship initiatives.

ecoTAGS™ are designed to create a sensory experience — stimulating sight and touch through visually appealing imagery and premium papers — warming buyers' senses to the positive reception of our clients' products and messaging, while enhancing brand value and brand retention.

our products
ecologically responsible.
carbon neutral.

green\$LEEVE™ — retail gift card sleeves

The Sallart Studios' greenSLEEVE™ gift card enclosure brings a new message of 'green' to retail gift card giving.

Designed and manufactured with environmentally responsible papers and processes, the greenSLEEVE™ can also function as a greeting card and complete gift package, reducing the gifting footprint of additional packaging, gift wrap and greeting cards.

greenSLEEVES™ are custom designed to create a gifting experience for our clients' customers and their recipients, while complementing our clients' brands. Displaying the eco-value and environmental certifications on-product, greenSLEEVES™ provide an eco-platform for our clients to promote social and environmental initiatives, foundations, charities, programs and targeted messaging — bringing enhanced marketing value to our clients' organizations.

ecoSKIN™ — corporate business card and flash drive enclosure

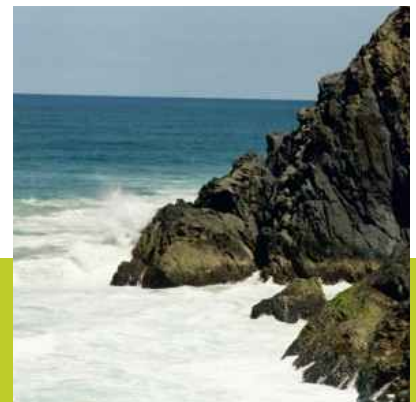

ecoSKINS™ are designed to hold a business card — with an optional flash drive pocket to share marketing collateral in electronic format — while promoting our clients' brands and targeted messaging.

Reducing the marketing paper footprint typical at tradeshows, conferences, events and meetings, ecoSKINS™ present our clients' brands on a premium, innovative eco-medium, creating a unique impression while cutting through the marketing and advertising noise.

Designed and manufactured with environmentally responsible papers, the ecoSKIN™ further reduces both the environmental impacts and financial costs of disseminating traditional print materials. The eco-value and environmental accreditations displayed on each ecoSKIN™ send a strong sustainability message to stakeholders and prospective clients.

PRODUCT ECO-VALUE: IN DETAIL

Bringing high eco-value to our customers is not only the right thing for us to do, but also provides a strong sustainability message for our clients' organizations to leverage in their communication initiatives, while enhancing their green business practices portfolio and triple bottom line.

Our sustainable design practices involve supporting responsible forestry, improvement of air quality, use of 100% green electricity and carbon offsetting for all paper usage, manufacturing and shipping. All Sallart Studios' products display the appropriate environmental certifications and eco-value, supporting our clients' green purchasing choices.

We strive to offer the most comprehensive environmentally responsible paper products in the industry. The following is a sampling of the eco-value included in our products:

- ▶ Sallart Studios Inc. is a Forest Stewardship Council (FSC) Chain of Custody (CoC) certified printer (SW-COC-003229). Our paper products are FSC CoC certified, or manufactured with tree-free alternatives.
- ▶ Our organization and all applicable products are Rainforest Alliance Certified, a forestry program that protects soils, waterways and wildlife, while ensuring that workers and neighbouring communities are treated fairly.
- ▶ Our products are designed and printed with 100% green electricity; carbon neutral energy that meets or exceeds the federal government's Environmental Choice Program EcoLogo^M standard for renewable electricity.
- ▶ All Sallart Studios' products are certified 100% carbon neutral. We offset the original manufacturing footprint of the papers we use — unless initially manufactured as carbon neutral — and the manufacturing of our products.
- ▶ The papers we use are sourced from paper mills operating with sound environmental practices. Our paper and raw material suppliers are selected after meeting specific criteria with respect to environmentally sustainable products, services and business practices.
- ▶ The paper eco-value can be further enhanced through selection of up to 100% Post Consumer Waste (PCW) content, Elemental or Processed Chlorine Free (ECF/PCF), manufactured using alternative energy sources such as wind and biogas, Green Seal certified and EcoLogo^M certified — as a sampling of options.
- ▶ We offer waterless printing and the use of vegetable based inks — contributing both to minimal water consumption used for print and considerably reduced levels of Volatile Organic Compounds (VOCs) being released into the atmosphere.

A percentage of all Sallart Studios' profits is donated to environmental conservation in order to give back to the planet we take from. Through the purchase of Sallart Studios' products, our clients' organizations are participants in supporting environmental sustainability initiatives, including the preservation and management of water, forestry, fishery and ecosystems.

“bringing high eco-value to our clients is the right thing for us to do — supporting our beliefs, our clients' green purchasing choices and the well-being of our shared planet”

social responsibility

**“...our goal is to create increase through value,
while leading by example”**

SOCIETY — OUR COMMUNITY AND THE GLOBAL COMMUNITY

Our goal is to bring value and opportunities for advancement to those directly engaged with our company, as well as individuals and organizations in our community and beyond. By offering value through our services, products, company interactions, and educational and philanthropic outreach, our goal is to create increase through value, while leading by example.

Social Outreach Program

We aim to foster opportunities for individuals and organizations to experience sustained and continuous growth through our Social Outreach Program, from our own community to the greater global community. Through educational programs, product donations for resale and use, donation of our time through activities such as pro-bono product design, at-cost product production and/or volunteering and monetary donations, we aim to reach as far as our means allow us in contributing to the greater good of our local and global society.

“we aim to foster opportunities for individuals and organizations to experience sustained and continuous growth...”

economic sustainability

“...we engage in all business dealings with integrity, fairness and respect”

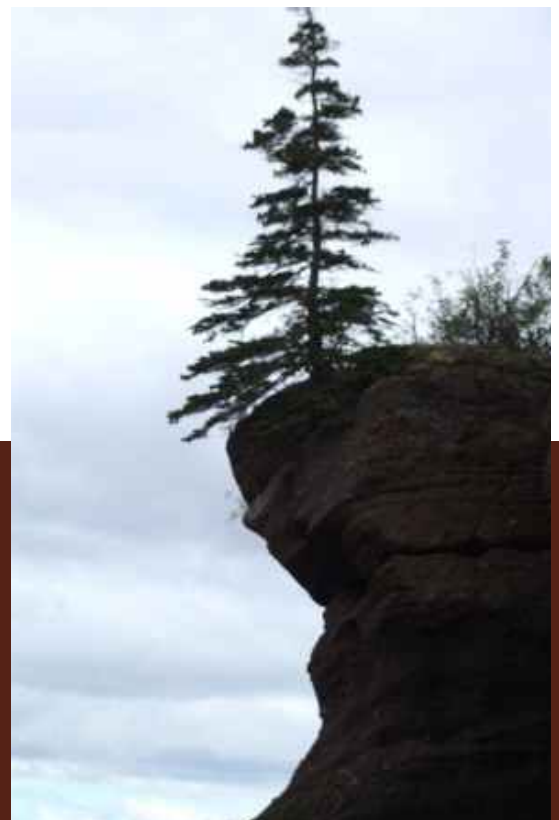

We embrace the generation of wealth and profits as a means of fulfilling our obligations to our investors, additional stakeholders and the well-being of our company. Maintaining economic growth is the backbone to advancing Sallart Studios' operations, products and services, while ensuring a paralleled growth of our environmental and social responsibility initiatives.

Incorporating eco-efficiency into our daily business operations allows us to continually manage and reduce operating costs in order to offer the most to our customers, while contributing positively to our economic health, the environment and the society within which we live, work and play.

Our mission is multi-faceted in terms of *creating* with the greater good of society in mind, while embracing the noble virtue of generating wealth and profits as a means of supporting our stakeholders and facilitating increase and advancement. We engage in all business dealings with integrity, fairness and respect, honouring all transactions and agreements to be conducted through the voluntary exchange of each party involved. We place high value in the ethical creation of wealth, with healthy profits being integral to the advancement of our company, stakeholders and society at large.

“we place high value in the ethical creation of wealth...”

workplace environment

“each employee has the potential to make a difference in contributing to a greater cause...”

Ensuring client satisfaction relies on the creativity, intelligence, energy and empathy of our employees. Facilitating the happiness and growth of our employees is integral to the success of our company.

Providing fair compensation and a safe environment within which to work is our fundamental duty as an employer. Beyond this, we believe a culture rich with inspiration and fulfillment is essential to our combined successes.

Sense of Team and Sense of Self

We cultivate an atmosphere for creativity, innovation and communication within a team environment, while supporting the autonomy of our employees within their roles. Continuous advancement is essential to the happiness of individuals; we encourage and support both personal and professional growth of our employees.

Sense of Community

The foundation of our company is built on the values and ethics of our Founders, beliefs that are woven into the sense of community within Sallart Studios. We encourage unity of vision throughout our company. Each employee has the potential to make a difference in contributing to a greater cause, through their individual or collective actions and participation within Sallart Studios. Within our Sallart community, we encourage a sense of play in order to stimulate both fun within the workplace as well as a breeding ground for great ideas and brainstorming sessions.

Respect

Respect of oneself and the respect of others is highly admired and promoted within our workplace, as it is integral in the advancement of our individual and collective beings. With respect, negative factors such as envy, judgement and discrimination can be minimized or even eliminated from our workplace, while more powerful dynamics such as love, unity, innovation, creativity and confidence may flourish in an organic and exponential manner.

A Level Playing Ground

Each individual at Sallart Studios, regardless of their longevity of employment or the position they hold, is recognized and appreciated as a fellow human being. We value our employees' intelligence and encourage their individual and collective insights and participation at all levels of our organization. We aim to be transparent in our communications and to provide relevant company information, empowering our employees with knowledge.

“...we encourage a sense of play in order to stimulate fun within the workplace as well as a breeding ground for great ideas and brainstorming sessions”

SALLART STUDIOS INC — A SUSTAINABLE DESIGN COMPANY

Incorporated in 2008, Sallart Studios Inc. is a purpose-driven sustainable design company, offering innovative and ecologically responsible products and services for corporations, organizations, government and wholesale retail markets.

We create and manufacture custom-designed premium paper products, certified with some of the highest and most widely respected environmental accreditations in the market — with a considerably deeper and detailed eco-value built in beyond the actual certifications.

Our Founders hold a deep admiration for nature and the environment on a local and global scale. In the interest of advancing the well-being of our shared planet, we are committed to integrating the most environmentally responsible initiatives within our company and product design, continually improving our sustainability practices while decreasing our environmental footprint.

Our sustainable design services include custom design packages, custom branding and messaging, and environmentally responsible print and manufacturing processes. We are certified 100% carbon neutral, powered with 100% green electricity, Forest Stewardship Council Chain-of-Custody certified (SW-COC-003229) and Rainforest Alliance certified.

OUR CORE VALUES

Sallart Studios' core values illustrate our company's mission, guiding us to work, live and play in an exemplary manner. We aim to exist in harmony with our core values, allowing them to flourish as our company continues to advance. There are times where we may fall short of our ideals and intentions; we will capitalize on these opportunities, allowing them to act as platforms for our education, advancement and continual improvement of ourselves, our company and our global community as a whole.

- ▶ Creating the highest quality products
- ▶ Providing an exceptional experience and value offering to our clients
- ▶ Bringing value to all individuals and organizations — from those engaging with our company to our local and global communities
- ▶ Operating with environmental stewardship at the helm of all decisions
- ▶ Cultivating creativity as a means to foster sustained and continuous advancement on a creative plane
- ▶ Generating profits and growth through conscious and ethical means
